COSTARS is a cooperative purchasing program managed by the Bureau of Procurement. It encourages a partnership between local public procurement units and state-affiliated entities (“members”) and the Commonwealth.

Several thousand eligible entities are currently taking advantage of existing Commonwealth contracts. Examples include Furniture, Heavy Equipment Rental, Office Supplies, MRO, Sodium Chloride (road salt), Vehicles, and Voting Systems.

It is estimated that COSTARS members spend \$1 billion per year using Commonwealth contracts and save more than \$220 million per year in transactional and spend cost reductions.

Our goal is to provide contracts with competitive pricing, while providing increased opportunities for suppliers and eligible participants.

influence both price and availability in the marketplace.

“Green” or **Environmentally Preferable Procurement** (EPP) is the selection of products and services that have a lesser or reduced effect on human health and the environment when compared with competing products or services that serve the same purpose.

Our policy is to analyze each item during the bid process to determine what EPP options are available. The “green” option is utilized whenever the product or service in question is comparable in quality, availability and price.
