**Re: Response to Request for Qualifications for GESA Project Consultant on a
Guaranteed Energy Savings Project at:
Pennsylvania Department of General Services
Reading, Scranton and Harrisburg
Project No: GESA 2023-1(C)
Entech File P230185.000**

Dear Ms. Tomlinson:

Entech has been helping its clients with their energy conservation efforts for over 40 years. Our highly qualified team brings not only years of energy auditing experience, but also the expertise to combine energy conservation recommendations with deferred maintenance and capital renewal needs. We design energy projects, help secure grants for project funding, help manage the construction, assist with securing an Energy Service Company (ESCO), and provide energy consulting throughout the ESCO process. Our design professionals use their energy expertise to help our clients implement selected energy measures and realize measurable energy savings.

Entech is uniquely suited to support the Department of General Services (DGS) on this GESA project. Entech has been selected to serve as the Energy Consultant for the past five GESA projects, including the projects for PennDOT, the PA Fish and Boat Commission, Wernersville State Hospital, and the State Correctional Institutes (SCI) at Fayette and Frackville. We also supported the SCI Dallas and Houtzdale GESA projects as a part of the design team. Through these projects, we have established relationships with the major stakeholders for GESA projects including DGS and the Penn State Facilities Engineering Institute (PSFEI).

As the State's representative, we have helped select the ESCO, validated Energy Conservation Measures (ECMs) developed by the ESCOs, reviewed design documents, and oversaw the implementation of selected projects. Through these projects, we have developed a deep team that understands the GESA process and how to support the funding agency. Our experience within the program allows us the ability to foresee and resolve problems that may otherwise slow down the project. Our proactive approach to the energy consultant role means that DGS will always have a member of our team ready to help.

As with previous GESA projects, our projects are led by the Principal-in-Charge (Bryan Haag) and the project manager. Entech has identified two potential project managers (Dana Boyer and Royal Smith) with experience leading projects through the development of an investment grade audit. Based on our experience, the development of the IGA requires a specialized team. The IGA development process requires a team knowledgeable in the GESA requirements, the proposed ECMs, the cashflow, and the ability to identify issues that may arise during construction. Our goal is to ensure that DGS has an experienced team to assist with this process.

Once the IGA is completed, the focus of the project changes to project management, design review, submittal approvals, and construction administration. These tasks require a different team than the IGA development team. Entech has several project managers with the skills and experience necessary to lead the design and construction teams.

The PennDOT, SCI Fayette, and Fish and Boat projects are currently in the construction phase. The Fish and Boat GESA project is expecting to have construction completed by the end of the summer. The Wernersville GESA project has completed the IGA development process, and the project will be entering the design phase shortly. The SCI Frackville project is expected to complete the IGA development within the next two months.

With those projects in the design or construction phases, our specialized IGA team will be available to assist with the IGA development for this GESA project.

The project team would also consist of Energy Engineers (John Sirc, JP Kloske, Brett Flory) and specialists in lighting design (Chris Darosh), Heating Ventilation, and Air Conditioning design (Craig Snyder, Michael Joppy), electrical engineering (Dave Mace, Nick Bloom), structural engineering (Mark Manowczak), and civil engineering (Kerry Good).

In addition to our experience in the program and deep team, Entech has offices close to each of the buildings included in the project. Entech's main office is located within a mile of the Reading State Office Building. Entech has staff within 30 miles of the other three buildings. With our proximity to the buildings, we have staff ready to assist with issues as that may arise during construction.

As noted in our past GESA EC proposals, our team has deep experience in both the assessment of existing systems and the design of new systems, giving us first-hand knowledge of not only the systems themselves, but also the analysis and design processes being implemented, and we know what works and what doesn't. We have gained invaluable experience in managing all the components and entities that must cooperatively function to implement a successful energy project that is completed in the best interest of our client. We believe that this experience and expertise will enable us to provide the leadership and guidance on this project that you have come to expect of us, and we look forward to this opportunity to develop a trusted partnership and successful project outcome.

Ms. Becky Tomlinson

New Jersey Treasury | Trenton, NJ**

APPENDIX A

Energy Consultant Information Form

ENERGY CONSULTANT INFORMATION FORM
(Complete in INK or TYPE only - DO NOT use pencil)

DGS GESA-2023-1 Consultant
LOCATION: Department of General Services, Reading & Scranton, PA

COMPLETE ALL APPLICABLE AREAS

Pa. Vendor ID Number: All GESA Consultants must be approved thru the DGS ITQ process: http://www.dgs.internet.state.pa.us/ITQ/Default.aspx	
ITQ CONTRACT NO.	4400016426
CONSULTANTS BUSINESS NAME: Entech Engineering, Inc.	
CONTACT AND TITLE OF PERSON:	Bryan C. Haag, P.E., CEM, LEED AP
ADDRESS:	201 Penn Street, Suite 300, P.O. Box 32, Reading, PA 19603
PHONE NUMBER:	717 .373.6667
E-MAIL ADDRESS:	bhaag@entecheng.com

A. List the number of full-time personnel currently employed with the firm. Each person should be counted only once. Do not include Sub-Consultants. Discuss use of Sub-Consultants in Section “D” and “E”, below.

	REGISTERED	PROF. DEGREE	CEM	OTHER	TOTAL
Architect	2	1		1	4
Civil/Structural Engineer	23	9		5	37
Mechanical Engineer	7	4	1	5	17
Electrical Engineer	3	4		5	12
Account Manager	2		1	2	5
Project Managers	5	18	1	1	25
Site Inspectors				17	17
Measurement & Verification	1			1	2
Other/Specialist	7	17		14	38

B. **Submit as a separate page to this form, on one (1) page, identify no more than three (3) projects that best illustrate your firm’s current qualifications to perform the review and construction services for this project. DO NOT list projects by consultants or by staff that will not be assigned to this project. Use the categories bulleted immediately below in describing identifying projects.**

- Project Name
- Location
- General Description of work performed by Consultant on this project
- Gross Const. Cost
- Duties Performed
- Fee
- Comments
- Contact References (include Email and Telephone No.)

C. **Submit as a separate page to this form, on one (1) page, listing the Key Sub-Consultant(s) (if needed) who will be retained to assist in the consultant’s process. Sub-Consultants Basic Service work in sum-total must be less than 50% of Total Basic Service Fees. Use the categories bulleted immediately below in listing Key Sub-Consultants.**

- Name of Sub-Consultant
- Address
- Specialty/Discipline
- Number of Projects Worked together
- Value of Projects Worked Together

D. **In the space provided below, indicate and list driving distances (in miles) from the office where the majority of the on-site personnel will be located to the project site. Use actual street addresses and Google or MapQuest to determine driving distance.**

 63 **Miles** (from Harrisburg location)

E. **Submit as a separate page to this form, on one (1) page, provide any additional comments or description of relevant information supporting your selection for Consulting Services on this Project. Information specifically related to this project is preferred over boilerplate or general marketing material. Why should your firm be selected for this assignment?**

projects

PA Department of General Services - GESA Program | Harrisburg, PA

PA Fish and Boat Commission

We are providing Energy Consulting services for the PA Fish and Boat Commission GESA project, where we are assisting the State implement Energy Conservation Measures (ECMs) at the Harrisburg headquarters and thirteen fish hatcheries to meet the Commission's goals of a reduction of energy consumption. We assisted the Commission in completing ESCO interviews, reviewing the IGA, reviewing the design documents, and conducting construction administration visits. The project has had approximately 90% of the ECMs installed to date. Recommended ECMs include replacement of window A/C units with heat pump systems, insulation improvements, thermal isolation of the headquarters server room, retro-commissioning of the headquarters HVAC controls, boiler replacements, variable frequency drives and transformer replacements. The guaranteed annual savings for the project were \$230,000.

Construction Cost: \$6.0M

Fee: \$471,124

Contact: Kathryn Bashear
717.705.7941

kabashear@pa.gov

PA Department of Corrections - GESA Program | Harrisburg, PA

State Correctional Institution - Fayette, PA

The SCI Fayette project is centered around upgrading a central utilities plant at a secured facility. The facility is completing a fuel switch from purchased steam to natural gas and installing high temperature hot water boilers. Entech has ensured that the ESCO meets the high standards required by the Department of Corrections and the Department of General Services. Entech worked with the facility and ESCO to maximize the savings to allow the site to address several areas of deferred maintenance. Deferred maintenance has included hot water generators, the fire alarm system, lighting inverters, and an emergency generator. The guaranteed annual savings for the project were \$3.2 million.

To date, Entech has assisted SCI Fayette with the:

- ▶ Selection of an ESCO
- ▶ Determining energy conservation measures
- ▶ Equipment Sizing
- ▶ Review of the utility bills
- ▶ Review of the Investment Grade Audit
- ▶ Review of the design drawings and submittals

Entech is currently focused on supporting the construction of the project.

Construction Cost: \$40.2M

Fee: \$1.4M

PA Department of General Services - GESA Program | Harrisburg, PA

PennDOT - Multiple locations

We are providing Energy Consulting services for the PennDOT GESA project, where we are assisting the State in implementing ECMs at 22 offices, 6 rest stops, and 90 stockpiles to reduce of energy consumption. We assisted PennDOT in completing ESCO interviews, reviewing the IGA, reviewing the design documents, and construction administration. The project is in the early phases of construction. The ECMs focused on lighting, upgrades to the HVAC systems, the addition on HVAC controls, hot water heaters, and emergency generators. The guaranteed annual savings for the project were \$800,000.

Construction Cost: \$27M

Fee: \$1.1M

key sub-consultants

Not Applicable. Entech will not be using any subconsultants for this project. We have the internal capacity to perform the scope of work proposed.

relevant information

As outlined in the cover letter, Entech has extensive consulting experience within the energy industry that will be directly relevant to the project at the Pennsylvania Department of General Services office buildings. Specifically, we have experience with the Guaranteed Energy Savings Act (GESA) program, including the following:

We have been selected to serve as the Energy Consultant for five (5) GESA projects. We have assisted in selecting the ESCO, the development of the IGA, review of design documents, and completed construction administration visits. Through this work, we are familiar with the requirements of the GESA programs and have worked with the funding agency, DGS, and the ESCO to ensure that the requirements have been met for the program. We have worked with several different ESCOs and with those connections already in place, we are able to minimize the learning curve that occurs when new teams are formed. We are also able to leverage these connections to advocate for the funding agency in ways other firms are not able to.

We've played a role in several GESA projects in Pennsylvania, including the first GESA project under the Wolf Administration for DGS at SCI-Dallas. Here we completed a Utility Master Plan (UMP) and then teamed with ESG to conduct an Investment Grade Audit (IGA) and subsequent design of the steam plant as well as an upgrade to the wastewater treatment plant. We are also working on the SCI-Houtzdale GESA Project, where we completed a UMP, performed an IGA, and served as the lead design engineer, having completed the design and worked with TEN to provide updates to the central heating and central cooling plants.

We have also provided energy assessment and consulting services for the State of New Jersey, specifically with State Correctional and Developmental facilities, and specifically within their Energy Savings Improvement Program (ESIP), which is very similar to Pennsylvania's GESA program. We are currently working with the State on their largest ESIP project to date at the Edna Mahan Correctional Facility and the adjacent Hunterdon Developmental Center. Serving as the M&V Professional, we were tasked to verify the energy savings projects and estimates produced by the ESCO so that the State could be confident in securing the loan for the project and proceeding with the ESCO. Our work involved review of construction drawings and the M&V plan, serving as an on-call advisor during design and construction, and

and executing the M&V Plan for the project. The project recently reached substantial completion. We are currently completing quarterly M&V reports for the project.

At the New Jersey New Lisbon Developmental Center, we performed an energy audit, which recommended \$14 million in ECMs and projected an annual savings of \$2.3 million. As part of this effort, we became a "P4P Partner" and oversaw the design and construction of the project, including the post-retrofit M&V necessary to apply for the rebates through the P4P program. New Lisbon reduced their energy by 45% and was awarded \$2 million through the P4P program.

We have also assisted the State of New Jersey with pre-ESIP efforts by completing energy audits and creating energy use models to determine how and where energy is used and to estimate savings associated with proposed ECMs. We have completed a pre-ESIP energy audit of the South Woods State Prison, where we recommended approximately \$25 million in ECMs with an annual savings of \$3.4 million and a 7.2 year payback. We have also completed a report for a pre-ESIP audit of Paramus Veteran's Home where we recommended \$5 million in ECMs with an annual savings of \$350,000 and a 13 year payback.

Our energy consulting work with PA GESA and NJ ESIP and P4P was preceded by the extensive work that we performed for the U.S. Architect of the Capitol (AOC). Having directed and conducted facility condition assessments, energy audits, historic preservation surveys, and utility performance studies throughout the U.S. Capitol Complex and supporting facilities, we provided the AOC with a holistic view of their sustainability, energy, and water conservation initiatives. We supported them in carrying out those initiatives through the development of a model energy management plan, and we guided them in communicating their initiatives and results to Congress through our annual energy reports over a five-year period.

APPENDIX B
Quote Signature Page

Quote Signature

Offeror's Representations and Authorizations. Offeror by signing on the signature page and submitting its Quote understands, represents, acknowledges and certifies that:

1. All information provided by, and representations made by, the Offeror in the Quote are material and important and will be relied upon by the Issuing Office in awarding the contract(s). Any misstatement shall be treated as fraudulent concealment from the Issuing Office of the true facts relating to the submission of this Quote. A misrepresentation shall be punishable under 18 Pa. C.S. § 4904.
2. No attempt has been made or will be made to induce any firm or person to refrain from submitting a Quote on this contract, or to submit a Quote higher than this Quote, or to submit any intentionally high or noncompetitive Quote or other form of complementary Quote.
3. The Quote is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Quote.
4. To the best knowledge of the person signing the Quote for the Offeror, the Offeror, its affiliates, subsidiaries, officers, directors, and employees are not currently under investigation by any governmental agency and have not in the last four (4) years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to bidding or proposing on any public contract, except as disclosed by the Offeror in its Quote.
5. To the best of the knowledge of the person signing the Quote for the Offeror and except as otherwise disclosed by the Offeror in its Quote, the Offeror has no outstanding, delinquent obligations to the Commonwealth including, but not limited to, any state tax liability not being contested on appeal or other obligation of the Offeror that is owed to the Commonwealth.
6. The Offeror is not currently under suspension or debarment by the Commonwealth, or any other state, or the federal government. If the Offeror has received, within three years of the issuance of this RFQ, a Notice of Default from the Commonwealth, other state or the federal government, then the Offeror shall submit, as part of the Technical Submission, seven copies of a written explanation of why such Notice of Default was issued. This written explanation shall not exceed 1 sheet (2 pages) and shall not count towards the sheet and page limit established for the Technical Submission of the Quote.
7. The Offeror has not, under separate contract with the Issuing Office, made any recommendations to the Issuing Office concerning the need for the services described in the Quote or the specifications for the services described in the Quote.
8. Each Offeror, by submitting its Quote, authorizes all Commonwealth agencies to release to the Commonwealth information related to liabilities to the Commonwealth including, but not limited to, taxes, unemployment compensation, and workers' compensation liabilities.
9. Until the awarded DGS Energy Consultant receives a fully executed and approved written contract from the Issuing Office there is no legal and valid contract, in law or in equity, and the DGS Energy Consultant should not begin to perform.

10. The total energy savings projected in the final scope of work will be at least 95% of the savings projected in the Quote and that the project will be self-funded over the financial term of the project (maximum term of 20 years.)

11. Offeror agrees and certifies in accordance with the enclosed Commonwealth of Pennsylvania:

- Nondiscrimination/Sexual Harassment Clause
- Tax Liability Certification
- Americans Disabilities Act
- Contractor Integrity Provisions
- Contractor Responsibility Provisions
- Environmental Statement
- Compliance with State and Federal Statutes, Rules and Regulations
- Non-Collusion Affidavit

I am authorized to sign this Quote on behalf of the Offeror and I agree and state that Entech Engineering, Inc. (Name of Firm) understands and acknowledges that the above representations are material and important, and will be relied upon by the Department of General Services in awarding the contract(s) for which this Quote is submitted. I understand and my firm understands that any misstatement shall be treated as fraudulent concealment from the Department of General Services of the true facts relating to the submission of this Quote.

Appendix C Non-Collusion Affidavit

“Entech was an important team member who identified 15 ECMs for consideration. These projects included new lighting, a new boiler plant, water reduction measures, and wastewater treatment plant improvements. Seven projects, totaling \$20 million were designed and constructed, with an annual energy savings of \$2.25 million.”

**Director, Resource & Energy Management
Pennsylvania Department of General Services | Harrisburg, PA**

APPENDIX C

Non-Collusion Affidavit

INSTRUCTIONS FOR NONCOLLUSION AFFIDAVIT

1. This Noncollusion Affidavit is material to any contract awarded pursuant to this Quote. According to §4507 of the Commonwealth Procurement Code, 62 Pa.C.S. §4507, governmental agencies may require Noncollusion Affidavits to be submitted with Quotes.
2. This Noncollusion Affidavit must be executed by the member, officer, or employee of the Offeror who makes the final decision on prices and the amount quoted in the Quote.
3. Bid rigging and other efforts to restrain competition, and the making of false sworn statements in connection with the submission of Quotes are unlawful and may be subject to criminal prosecution. The person who signs the affidavit should examine it carefully before signing and assure himself or herself that each statement is true and accurate, making diligent inquiry, as necessary, of all other persons employed by or associated with the Offeror with responsibilities for the preparation, approval or submission of the Quote.
4. In the case of a Quote submitted by a joint venture, each party to the venture must be identified in the Quote documents and an affidavit must be submitted separately on behalf of each party to the joint venture.
5. The term “complementary Quote” as used in the affidavit has the meaning commonly associated with that term in the Quote process, and includes the knowing submission of Quotes higher than the Quote of another firm, any intentionally high or noncompetitive Quote, and any other form of Quote submitted for the purpose of giving a false appearance of competition.
6. Failure to submit an affidavit with the Quote in compliance with these instructions may result in disqualification of the Quote.
